

OF ANOMALY

DIBAKAR PAL ¹

¹ RETIRED EXECUTIVE MAGISTRATE (CIVIL SERVANT) & PHD STUDENT, DEPARTMENT OF BUSINESS MANAGEMENT, UNIVERSITY OF CALCUTTA, INDIA.

ABSTRACT:

In family life between husband and wife if one of the two is anomalous in nature and behaviour then it causes problem and normal life is disturbed. The paradox is that if both are anomalous then the family experiences more than normal life. The matter can be explained in the light of algebra of mathematics. In algebra multiplication of two negative numbers i.e., minus into minus equals to plus. One school of thought contends that two anomalous persons are afraid of each other. Another school of thought opines that they either are made for each other or mad for each other or both for both simultaneously.

INTRODUCTION

Creative writing is based more on manifestation rather than on expression. It does not inform, rather it reveals. So it bears no reference. The best creative writing is critical, and the best critical writing is creative. This article is an outcome of thinking about creative writing meant for a general readership. As such, I have adopted a free style methodology so that everyone can enjoy the pleasure of reading. As you might know, Francis Bacon (1561-1626), the immortal essayist, wrote many essays namely 'Of Love', 'Of Friendship', 'Of Ambition', 'Of Studies', and so on. The multiple-minded genius correctly pointed out that all the words of the dictionary can be used as themes for essays. But little has been done since his death to continue or finish his monumental task. Bacon's unique individual style of presentation ignited my imagination and encouraged me to write creative essays as a method of relieving a wide range of emotions through catharsis.

ARTICLE

Anomaly is something that deviates from what is standard, normal, or expected. For example: There are a number of anomalies in the present system.

It is something different, abnormal, peculiar, or not easily classified. For example: They regarded the test results as an anomaly.

It is deviation from the common rule, type, arrangement, or form. It implies irregularity.

It is a person or thing that is different from what is usual, or not in agreement with something else and therefore not satisfactory. For example: Statistical anomalies can make it

difficult to compare economic data from one year to the next. The anomaly of the social security system is that you sometimes have more money without a job.

It is an anomalous person or thing. It is one that is abnormal or does not fit in. For example: With his quiet nature, he was an anomaly in his exuberant family.

In astronomy it is the angular distance of a planet from its perihelion as seen from the sun.

Anomaly is a negative factor. It may be real or artificial. One should identify it. Then one can avoid or modify or resist it.

Due to anomalous attitude of the concerned members many organisations face trouble. Family gets destroyed for malicious behavior of the earning member. Women and children suffer most.

Any situation is the resultant outcome of many known, unknown, controllable and uncontrollable factors. Similar is the result of any experiment. In laboratory parameters may be controlled. In nature it cannot be. Climate and mood of the lover are the most striking examples of these kinds.

Both climate and human mood change. They fluctuate. Both appear with anomaly. Both are quite unpredictable too. It seems they enjoy and manifest democracy. Thus they are for anomaly, by anomaly and of anomaly. If they are not anomalous in nature or if they do not differ then their normalcy are liable to be questioned. But in case of human being it is a demerit.

Thus a situation or result of an experiment may be

different from normal or standard. Then an expert can correct it. If behaviour or expression is abnormal then the person suffers from insanity. In such a case the person is a psychiatric patient. Early and proper treatment is a must for its recovery. Late action of such a patient causes permanent anomaly in behaviour and expression as well.

Like man it is equally true in case of any machine or car. If a machine is not maintained regularly then rust defuncts it and the machine goes out of order permanently. Similarly, if any minor defect of the car is not removed timely through proper servicing then the car faces accident. This is severely true in case of aero plane and satellite. An experienced pilot never agrees to fly even with minor anomaly in the flight. Then in the mid-sky he has nothing to do except death.

A bad worker always quarrels with his tools. It is not anomaly, rather lame excuse. It is an avoiding tactics. It is difficult to make unwilling horse drink water. This strategy does not pay in the long run. The person cannot prosper in life due to lacking in work culture. He becomes dependent. He has to live on the mercy of others. Once he avoided duty. Now not only beauty rather everybody avoids him. Misfortune dogs him wherever he goes. He suffers till he breathes his last.

All cannot avoid. It is an art. Someone rejects crudely. It causes anger. Sometimes it culminates into mishap. Then the person has to modify his anomalous behaviour. Someone disagrees with polite voice. It awakes respect. It is a wise tool.

A business man if shows anomaly with his assurance is sure to ruin. Business means good will which means virtual cash. Actual cash has limit. But virtual cash is unlimited. Sky is its limit. Thus where actual ends virtual begins.

A lover if shows anomaly with her lover then either he is mad or he has another lover or more lovers or both simultaneously. They say he who wants to please everybody can please nobody. If the lover cheats then none loves him. One can deceive someone once. He cannot make someone fool always. He cannot cheat all and everybody. Then he is avoided by all in spite of his attractive complexion. He remains unloved.

A fool cannot realise the cause of anomaly. He has no such capacity to discover the reason responsible behind abnormality. His present path differs from his known path. Then he either shouts or becomes puzzle or both simultaneously to overcome the danger. But this callous attempt cannot save him from the problem as is faced with. He tries in vain to reach through short cut method which cut short his life.

In contrast a wise when faces any such unprecedented situation he does not become nervous. He takes the situation calmly with cool temperament. He tries to find the cause or because of the undesired event. He finds the reason. He solves the problem. Thus he gets relief. Also the learned takes corrective measures so that it recurs not further in future.

A novice ignores anomaly. He thinks it will cause or create no problem at all in future. It has come accidentally and will go away automatically like autumn cloudlet. So he finds no necessity to consider it seriously. But unfortunately many times anomaly appears. A wise never ignores or overlooks it. He knows the future consequence of any trifling but important matter or manner. The learned knows, "A stitch in time saves nine".

All anomalous things do not create trouble. They have various gradations. Some are normal. Some are abnormal. Some are real. Some are artificial. Some are virtual. Some are actual. As such action to be or not to be taken as per gravity of the concerned thing. Here decision plays a crucial role. A wise decides judiciously and becomes successful. In contrast a fool takes care where it is not required but cares not at all where utmost care is a must thereby loses both ways.

A bad student finds anomaly with the questions in the examination. He is less attentive. He does not read books or simply reads the summary only. He only knows to play straight bat as is seen in the cricket. He cannot answer the critical questions. He is fool. But he is sly. He is not intelligent at all. Sly is mundane. Intelligence is divine. He can manage the earthly affairs. But he cannot manage it always which an intelligent person can do. The learned can tackle the anomalous problems of life through his innovative mechanism. His wisdom is his tool.

Anomalous expansion of water is a problem during winter season. The expansion of ice causes fracture or crack in the metal pipe that carries water. It is a technical problem and tackled by the technician.

An anomalous person is not normal at all. He likes abnormality. He prefers abnormality. He opts for abnormality. He finds no wrong in abnormality. He feels and finds comfort in it. He is so uniquely tuned. As such anomalous persons should be handled with utmost care.

Anomalous persons are of three types.

The first category is rigid. He cannot be moulded. Such a person is good in one sense that he follows a definite principle which may or may not be good. He has definite locus standee. It is his merit.

The second category can easily be moulded by either money or oiling or combination of both. Such a person is not so difficult to manage. He is good if he favours credit transaction since always cash may not be available. Sometimes he accepts cash. Sometimes he accepts kind. Sometimes he accepts cocktail of both. The proportion of cocktail is not fixed rather varies depending on concerned payee, sex, complexion, personality, time, place, situation, etc. Sometimes he accepts nothing if is compensated otherwise.

The merit of second category is that he can easily be moulded. The demerit of second category is that he can easily be moulded. He possesses both merit and demerit simultaneously. It is his rare individual style and unique in nature. It is quite puzzling. He puzzles all. But he is not

puzzled. He gives his consent to all. Thus he has no locus standee at all. He decides something in the morning. He declines the same in the evening of that very day. He starts for somewhere but goes elsewhere. He is mad. His companions will be greater mad in course of time if they stay with him for a longer period of time.

The third category is very difficult to manage. He is moody. He is choosy. He is foodie. Thus he has three feathers in his cap. Sometimes he agrees. Sometimes he agrees not. He agrees if he likes. He agrees not if he likes not. Thus his mood and motive are gloriously so uncertain. He is the worst among the three.

In family life between husband and wife if one of the two is anomalous in nature and behaviour then it causes problem and normal life is disturbed. The paradox is that if both are anomalous then the family experiences more than normal life. The matter can be explained in the light of algebra of mathematics. In algebra multiplication of two negative numbers i.e., minus into minus equals to plus. One school of thought contends that two anomalous persons are afraid of each other. Another school of thought opines that

they either are made for each other or mad for each other or both for both simultaneously.

CONCLUSION:

Life is not a bed of roses. As such every morning does not dawn as usual. Also all the mornings may not appear with known appearance. Thus anomalous is quite natural. But the paradox is that anomalous is not considered as normal. Those who can tackle the anomalous situations are happy. It depends upon expertise. It depends on luck. All are not experts. All are not lucky. Actually conversion of anomalous i.e., crisis into opportunity is an art. All are not artist. All cannot be artists. All are not destined to be artist. Very few get it. More few can hold it for long. This answers why anomalous situations are very difficult to conquer.
