

OF PROCESS

DIBAKAR PAL ¹

¹ RETIRED EXECUTIVE MAGISTRATE (CIVIL SERVANT) & PHD STUDENT, DEPARTMENT OF BUSINESS MANAGEMENT, UNIVERSITY OF CALCUTTA, INDIA.

ABSTRACT:

Process is a concept. It is abstract thereby unseen. As such an intelligent person calls it under process. It means it may take indefinite period of time. Obviously, indefinite is not infinite.

Man experiences various facets of life viz., childhood, teenage, youth, autumn of life, old age and last of all death. These are the chronological and inevitable events of life appear through unique processes.

KEYWORDS:

PROCESS, ACTION, TIME, METHOD, PROGRESS, COURSE.

INTRODUCTION

Creative writing is based more on manifestation rather than on expression. It does not inform rather reveals, so it bears no reference. The best creative writing is critical, and the best critical writing is creative. The present article is the outcome of creative writing meant for lay readers. As such free style is the methodology adopted so that pleasure of reading can be enjoyed by the common mass. As you know well that Francis Bacon (1561-1626), the immortal essayist, wrote many essays and notably, *Of Love, Of Friendship, Of Ambition, Of Studies*, etc. The myriad-minded genius rightly pointed out that all the words of the dictionary can be the themes of essays one can write. But little has been done, in this regard since his death, in order to finish his unfinished monumental works. In fact Bacon's way of presentation i.e., his unique style kindled the imagination already in me and encouraged me as well to write essays, in the light of creative writing, thus to get relief through Catharsis.

ARTICLE

Process is a series of actions or tasks performed in order to do, make or achieve something.

It is a series of changes, especially ones that happen naturally. It is a method of doing or making something especially one used in industry. It is to put a raw material, food, etc, through an industrial or a manufacturing process in order to change it, preserve it, etc. It is to treat something. It is to deal officially with a document, request, etc.

Process is a state of being in progress or being carried on. It is a course. It is a narrative. It is a series of actions or events. It is a sequence of operations or changes undergone. In print it is a photo process. It implies progression. Biologically, it is a projecting part of a structure or organism, especially, on a bone. It is to

produce or print photo-mechanically. It is to prepare, e.g. agricultural produce, for marketing, by some special process e.g. canning or bottling. It is to arrange documents, etc. systematically. It is to examine and analyse. It is to test the suitability of a person for some purpose. In computer, it is to perform operations of adding, subtracting, etc., or other operations on data supplied. It is to subject i.e. data to such operations. It is to perform a series of operations on something in a computer. Thus it is computing i.e. operate on data by means of a program.

It is a systematic series of actions directed to some end. It is a specific, continuous action, operation, or series of changes. It is act of proceeding. It is the state of being submitted to a continuing action or series of actions. It is course or lapse, as of time. It implies photog. i.e. photomechanical or photoengraving methods collectively. It is to treat or prepare by some particular process, as in manufacturing. It is to handle persons or matters in a routine, orderly manner. It is noting i.e. pertaining to, or involving photomechanical or photoengraving methods e.g. process printing.

Process is a course of action or procedure, especially a series of stages in manufacture or some other operation. It is the progress or course of something e.g. in process of construction. It is a natural or involuntary operation or series of changes e.g. the process of growing old. As per Anatomy, Zoology, & Botany it is a natural appendage or outgrowth on an organism. It is to handle or deal with by a particular process. It is to treat material; food especially to prevent decay, by particular process e.g. processed cheese.

It is the course of being done i.e. chiefly in in process. It is course of time, etc. It is a continuing development involving many changes e.g. the process of digestion, reproduction and growth. It is a particular method of doing something, generally involving a number of steps or operations. It is a man's hairdo in which the hair is

straightened by applying a chemical preparation and styled. As per Anatomy it is a projection or outgrowth from a larger structure, usually a bone e.g. the alveolar process of the jaw.

As per Law, it is an action or suit. It is to prepare by or subject to a special process or method. It is to prosecute. Also it is to serve a process on prepared by a special treatment or process. Legally, it is a writ or summons directing a defendant to appear in court or enforcing compliance with a court's orders. It is the total of such writs in any action or proceeding. It is an edict.

Also process means to walk or move in or as if in procession. Process of learning to read and write is very important. Dismantling a structure is a slow process. A book is reprinted by photographic process.

Processor is a person or thing that processes something. It is a machine that processes things e.g. data processor, word processor, food processor, micro processor, etc. It is a device viz., computer which processes data. In computer it is a central processing unit.

In process means going on, being done. In process of means construction, etc. It is being constructed, etc. In the process of means carrying out or on an activity, or being carried out or on. In process of time means as time goes on.

Process server is a sheriff's officer who serves writs. He is a bailiff. Process-block is a photo-mechanically made block for printing a picture. Data processing is the handling and processing of information by computers. Process heat, steam, etc., are those got as by products of manufacturing process.

Processed is produced by a special process, as synthetically, photo-mechanically, etc. Process cheese or processed cheese is a cheese made by heating and blending together several natural cheeses with an emulsifying agent.

Process, procedure, proceeding apply to something that goes on or takes place. A process is a series of progressive and interdependent steps by which an end is attained e.g. a chemical process. Procedure usually implies a formal or set order of doing a thing, a method of conducting affairs e.g. parliamentary procedure. Proceeding applies to what goes on or takes place on a given occasion e.g. May I interrupt the proceedings for a moment.

Process is a concept. It is abstract thereby unseen. As such an intelligent person calls it under process. It means it may take indefinite period of time. Obviously, indefinite is not infinite. Different events take different time. It is not fixed rather variable. Its controlling parameters are plural. This plurality renders it uncertain and difficult in nature. If a person has no knowledge then he cannot ascertain the time required for a particular case. In operation of patient a non-medical person cannot guess the time and money thus needed. A fool argues. But a wise does not argue for the subject beyond his knowledge. Some shrewd persons consult with many before taking any decision. They do not

know the time required for processing due to their ignorance. A confident wise seldom consults.

Man experiences process. Man has to experience it. Man is bound to experience it. Thus man experiences it infinite times from cradle to grave in different forms and features having varied degree and dimension as well.

Process means time. It is alias and akin to time required. It is seldom instant like instant coffee as is observed in advertisement. So a restless person cannot bear the time required and abuses accordingly. But a wise knows that water will absorb heat and then it will be hot. It is a simple process with less time consumption. Thus any process is neither instant nor it is automatic rather it requires time little or more.

The authority should begin the difficult i.e. gradual process of reforming the education system. Unloading the cargo is a slow process. Teaching the patient to walk again is a long and painful process i.e. a slow and difficult one. We are still in the process of selling our house. I was moving some furniture and twisted my ankle in the process i.e. while doing it. An opportunity to advance the peace process should not miss. The decision-making process should be very careful to avoid future complicity. The selection process should be genuine for the sake of transparency. A health conscious person is cautious about the digestive process. A normal part of the ageing process is quite common. He began the slow process of recovery.

The process used in cement production is latest. Technical changes in the process of movie-making have brought revolution in this industry. They have developed a new process for rust proofing car bodies.

Most of the food we buy is processed in some way. Processed cheese is very popular among the city-dwellers. I sent three rolls of photos away to be processed. A sewage processing plant is quite indispensable in the urban zone. It may take a few weeks for your application to be processed. The bishops, priests and deacons processed slowly through the cathedral.

CONCLUSION

Man experiences various facets of life viz., childhood, teenage, youth, autumn of life, old age and last of all death. These are the chronological and inevitable events of life appear through unique processes.
