

OF OPTION

DIBAKAR PAL ¹

¹ RETIRED EXECUTIVE MAGISTRATE (CIVIL SERVANT) & PHD STUDENT, DEPARTMENT OF BUSINESS MANAGEMENT, UNIVERSITY OF CALCUTTA, INDIA.

ABSTRACT:

Someone is leftist, someone is rightist. There are some people who opt for neither. They are neither leftist, nor rightist. Rather they are Middle East. They dwell at the threshold of these two options and wait for opportunity. Thus their mood and motif are gloriously so uncertain. Because sometimes they are leftist and sometimes they are rightist. As such people call them opportunist. So they are either dangerously brilliant or brilliantly dangerous or both simultaneously.

KEYWORDS:

OPTION, CHOOSE, POWER, LIBERTY, RIGHT OPTION, WRONG OPTION.

INTRODUCTION

Creative writing is based more on manifestation rather than on expression. It does not inform, rather it reveals. So it bears no reference. The best creative writing is critical, and the best critical writing is creative. This article is an outcome of thinking about creative writing meant for a general readership. As such, I have adopted a free style methodology so that everyone can enjoy the pleasure of reading. As you might know, Francis Bacon (1561-1626), the immortal essayist, wrote many essays namely 'Of Love', 'Of Friendship', 'Of Ambition', 'Of Studies', and so on. The multiple-minded genius correctly pointed out that all the words of the dictionary can be used as themes for essays. But little has been done since his death to continue or finish his monumental task. Bacon's unique individual style of presentation ignited my imagination and encouraged me to write creative essays as a method of relieving a wide range of emotions through catharsis.

ARTICLE

Option is the act or an instance of choosing. It is the power, right, or liberty of choice.

It is something that is or can be chosen. It is the right, acquired for a consideration in stock exchange etc. to buy, sell, or lease something at a fixed price, sign or renew a contract, etc. within a specified time. In case of dictatorship people have no choice, rather voice of dictator is final. The tyrant opines that mass have no choice and that should be their choice. This rudeness of the dictator is quite unethical. Thus option offers freedom to both voice and choice. Its essence is to respect human rights. There is no compulsion or obligation. It pleads for liberty and thereby democracy. Here a person enjoys cent percent liberty like a bird that flies in the unobstructed sky in any direction. An independent person realizes his ambition through exercising the power of option without any influence or threat or shame. Compulsion is a hindrance to free

thinking. It is akin to pain. Its output is stereotyped. So everybody hankers after option to serve and satisfy his egoistic attitude. It is the discretionary power man exercises or enjoys.

The outcome of option may either be good or bad. It is good when it allows to manifest the perfection or desire of a creative genius. But if the choice is wrong then option causes pain rather pleasure instead. Then compulsion is far better. So decision must be judicious.

Here experience helps to opt. The success of a novice or an inexperienced person solely depends on intellect or clarity of thought. In politics right man in the wrong party is an example of bad option. In such a case both party and person become unhappy. Here a judicious person submits resignation before expulsion from the party.

Compulsion builds the character and option helps to flourish it. A civil engineer first constructs a building then an architect ornaments it through option. Both flourishing and ornamentation are not basic need but get fulfilled through right options. Through ornamentation the essence of aesthetic beauty gets manifested. So childhood should be channelled through compulsion. After certain period the innocent souls should be freed to enjoy the blessings of options. The merit of childhood is that it can easily be molded.

Similarly the demerit of childhood is that it can easily be molded. But a characteristic trait cannot simultaneously be merit and demerit for itself. If so then that very trait is harmful at that period of life. Mother's affection is must for the tender soul. Similarly primary education is compulsory for every child to face the reality. Higher education is enriched with different options.

Option is easier to choose from two alternatives. But it demands time and reasoning power when alternatives are many. Here both novice and experienced take time more

or less to choose. When selection is based on intellect there lies no problem. But it causes problem when emotion opts and chooses from available alternatives. Emotion has no base as well as no brake at all. As such when emotion rules the intellect, man becomes helpless. If the alternatives are equally likely, then any choice rebukes the man why it did not pick up the other one. The most interesting paradox is that emotion disturbs again why the person did not collect the other one, even after collection that very one left earlier. The most surprising event is that emotion pleads that exchanged thing was not good, rather the non-chosen one was better. It is a never ending game. An unfortunate lover faces this very unique problem when each of his fiancée is rich in beauty.

Sometimes, the Fate of such a lover is so cursed that he remains bachelor. An indecisive person experiences the difficulties of such different uncontrollable emotions of mind.

Such a character suffers from lack of confidence.

Option is like privacy man nurtures secretly. A lover chooses the better face from two options. When a lover faces many beautiful faces then he faces much difficulty to select a single one. Various options open to him render him mad. They are made for each other.

Also they all are mad for each other simultaneously. This madness has two solutions.

Either the lover can marry all his fiancées or marry none thus to please everybody. Since polygamy is forbidden in the civilized society the lover cannot marry all his lovers. Here lies the utility of option. Also he is bound to opt for the sake of chastity of women and thereby society at large. Even the society permits him to polygamy, he cannot please all.

Because those who want to please everybody can please nobody. Further, if the lover decides to remain bachelor and he does not disclose it then his fiancées will run after the mirage. This is the unsaid story of many bachelors.

Right option builds the career of any student. If a student of science opts for humanities or a student of humanities opts for science courses then both the students fail successfully. So, a student should opt as per his interest towards the concerned subject.

Here guidance of teacher is very important. He can select the right track according to the tendency of the concerned student.

Some persons opt. someone opts not. To them no option is also an option, like no politics is also a politics or no style is also a style or no statistics is also a statistics. Also a person does not opt when none of the options is satisfactory. In such a case the authority exercises its power to opt as per norms.

Option gives liberty to cancel any agreement or treaty when it reaches the norms or condition. Man is helpless when there is no option. In some judiciary system there is option for imprisonment or fine. Sometimes there is imprisonment without the option of fine. If the crime is

severe then both rule simultaneously. Someone opts immediately.

Someone prefers soft option. Someone keeps his option open to decide later. It depends on the situation. Here it should be kept in mind that chance comes once. Only a judicious brain can take the right decision. He who has foresight strikes the iron when it is hot. A shrewd politician opts out from the present party and joins another promising one for better prospect. In some countries an opted-out school or hospital decides to withdraw from the control of a local authority but funded from central government for certainty and security.

An employee takes the lien from his present employer to come back again if the new assignment is unfavourable. Here option saves a person since future is uncertain. In some car cd player is an optional extra i.e. it will cost extra if one chooses to have it. In some cases option exercised once is final. It cannot be changed. The striking example of this kind is marriage. Society allows its members to choose and opt from various alternatives only for once before marriage. Thus it binds its members through option. First option is the last option. Society does it just to protect the Fate of the children and chastity of society as well. Before marriage life partner should be selected very cautiously. Because marriage is a long journey and tolerance is its only fuel. Otherwise, extra marital affairs get entry causing social problem. And the house of orphans gets overcrowded due to divorce or leading fast life. As such option is so important and here lies the utility of option in real life.

Emotion is the enemy of man. A married man may meet a beautiful woman. This meeting has two outcomes. Either the man can conquer the allurements or he may respond to her call ignoring his wife. The main danger of such involvement is that the man again responds another beckon. This is the story of infinite serials.

Someone is leftist, someone is rightist. There are some people who opt for neither. They are neither leftist, nor rightist. Rather they are Middle East. They dwell at the threshold of these two options and wait for opportunity. Thus their mood and motif are gloriously so uncertain. Because sometimes they are leftist and sometimes they are rightist. As such people call them opportunist. So they are either dangerously brilliant or brilliantly dangerous or both simultaneously.

Human being has two options either life or death. Half-dead is quite troublesome and full of uncertainty. Because, the man may die or exist again. The chance is fifty-fifty.

Sometimes miracle happens. Similarly computer has binary options either zero (0) or one (1). But computer has no Middle East option. So it is free from miracle events. Many options perplex a man. The confident person can choose any one and stick to that very one. But those whose habit is to vacillate will fluctuate always from cradle to coffin, whether the option be binary or many it matters little.

Human life has binary outcomes. Either win or defeat. Win encourages to move forward.

Defeat invites frustration and causes retardation. Then the person may try again or change the option. Trial and error method is the best tool in scientific investigation. It has immense applications and utility in real life. Teacher advises does and don'ts. It helps a student to build up his career. In danger, sixth sense helps a man to choose the best option. This choice depends on his previous experience which is the outcome of statistical interpretations. Truth has no option. It is an example of definite article. It is singular in number. Truth has no substitute. It itself is its substitute. As such it is definite option. But lies are many. Lies are the examples of indefinite article. These are plural in number. Rather, these are infinite in number. These infinite lies act as infinite number of options. Thus plurality of lies renders life so complicated. Variety is the spice of life. A dynamic person crazily adds those spices like options to make his life enjoyable more. If the choice of option is good life becomes better. But if the selection is bad life becomes worse instead.

Option is everything. That means everything depends on option. Human life is a collection of various stages. Each stage gets its perfection exercising right option. Every stage has its definite job allotment. A child will play. A student will read. A man will earn. And lastly old age is for relaxation. Now, if a child is engaged to earn then he is derived from playing and reading. It not only loses its childhood and student life rather its future becomes uncertain. Similarly if an old man is bound to earn then he will die soon. His mundane relaxation gets divinity due to wrong option exercised in early life.

CONCLUSION

Lastly, like everybody a successful editor opts always for good article. He seldom compromises with rubbish submission. He is not impartial rather partial for quality outcome. Though the author becomes unhappy for rejection but he is quite undone. He knows that not quantity rather quality is the yardstick of measuring standardization of any reputed column that acquires fame always. Survival of the fittest is the only key for existence. Otherwise his publication will be the store house of garbage causing premature death. As such an editor always opts cautiously. And to maintain strictness and thereby enjoy discretionary power if any deserving article is rejected, it is even better than to publish a substandard article. In such a case his error of judgment may not be dealt with so severely, rather garbage publication will be badly criticized thereby sadly hurt.
