

OF TOTAL

DIBAKAR PAL ¹**¹ RETIRED EXECUTIVE MAGISTRATE (CIVIL SERVANT) & PHD STUDENT, DEPARTMENT OF BUSINESS MANAGEMENT, UNIVERSITY OF CALCUTTA, INDIA.****ABSTRACT:**

Beauty or complexion is the outcome of total. A face is beautiful only when all of its constituent parts are judged totally. Here single item cannot be judged in isolation or may not have remarkable contribution in total. The perception of beauty or fear is the manifestation of total. The eyes may be beautiful. The lips are attractive. The nose is sharp. But single matter enjoys synergy through gathering of other factors. Here one factor influences the other one either in positive or negative way. It is a summation decision of the concerned person.

KEYWORDS:

TOTAL, SUMMATION, RESULTANT, NET, RESULT, OUTPUT.

INTRODUCTION

Creative writing is based more on manifestation rather than on expression. It does not inform rather it reveals, so it bears no reference. The best creative writing is critical, and the best critical writing is creative. The present article is the outcome of creative writing meant for lay readers. As such free style is the methodology adopted so that the pleasure of reading can be enjoyed by the common mass. As you know well that, Francis Bacon (1561-1626), the immortal writer, wrote many essays, and notably "Of Love", "Of Friendship", "Of Ambition", "Of Studies", etc. The myriad-minded genius rightly pointed out that all the words of the dictionary can be the themes of essays one can write. But little has been done, in this regard since his death, in order to finish his unfinished monumental works. In fact Bacon's way of presentation and his unique style kindled imagination and inspired me to write essays, in the light of creative writing, thus to get relief through Catharsis.

ARTICLE

Total means summation of events or collection of events. Resultant is akin to total. A life is judged in the light of life time achievement that is totality. Return on Investment (ROI) is the net result or output of any project. Conclusion is the outcome of totality. Scattered accounts always may not be possible. In some cases individual item is considered. But last of all total helps to decide the best one among alternatives.

Beauty or complexion is the outcome of total. A face is beautiful only when all of its constituent parts are judged totally. Here single item cannot be judged in isolation or may not have remarkable contribution in total. The perception of beauty or fear is the manifestation of total. The eyes may be beautiful. The lips are attractive. The nose

is sharp. But single matter enjoys synergy through gathering of other factors. Here one factor influences the other one either in positive or negative way. It is a summation decision of the concerned person.

Total ranks a student for his performance. Total is omnipresent. Everywhere and every moment everybody is engaged to find the total of any event and decides accordingly. I am here. Because it satisfies me. And it is most profitable among all options. So I wait here. She leaves. Because she finds it more profitable and thereby enjoyable to go elsewhere. These all are the manifestation of totality. In fact man always opts for the best returnable among options.

A man has many personality traits. If his most of the traits are common with another person then friendship grows. Also friendship occurs if his traits may not be common but are liked by the stranger. Thus cent percent similarity and thereby total friendship is impossible. But friend selection is the outcome of totality. A man, before selecting his friend, first finds the summation of different characteristics of different persons. The more marks the better friendship. In fact everybody grades other persons on the basis of the total.

In purchasing, selling or selecting life-partner, everywhere we take the help of total. The success of any person depends on that total value. A man fails only when he values the worst thing or assigns lower value to the important factors. A student makes good result only when he reads attentively. A good student takes judicious decision that he will not waste time rather he will read attentively. This was his decision based on the sum total of various factors. A bad student wastes valuable time of student life thus responding to different allurements. Thus a bad student suffers throughout life for this callousness and lack in judgment and very few student can compensate

the deficiency.

At last is the alias of total. Total offers its result in future. Instant result may not always be possible. An attentive student gets result in future of his total decision of reading attentively.

CONCLUSIONS

In any computer programming the entire program is broken into separate modules. Then all the modules are taken together to prepare the total program. Construction of total program is difficult and troublesome. Here single module has no value at all until or unless all are taken together. Here lies the importance and triumph of totality. Further, to maintain secrecy a group of workers are divided and entrusted with separate and single job. Nobody knows the total job. Only the manager knows it and controls it with master mind. Here, the workers becomes expert in single job but to them total remains unseen and unattainable forever.

ABOUT THE AUTHOR

Pal, Dibakar is a Retired Executive Magistrate in India and PhD Student. Though he is a Civil Servant yet he is genuinely interested in diversified academic fields. As such, he holds master degrees in M.Sc(Math), M.A(English), M.A(Bengali), M.B.A(HRD), M.C.A, P.G.D.M.M(Marketing), L.L.B, D.C.E(Creative Writing), M. Phil (Business Management),UGC- NET(Management)-2008. He attended an International Conference at IIT, Mumbai, India and five International Conferences at U.S.A; though he gets invitation to present papers in many International Conferences at home and abroad round the year. He presents papers on Computer Science, Management, English Literature, Linguistic, Philosophy, Philology, Psychology, Sociology, Humanities and Poems. He presented a paper on Computer Science and Chaired in 2007 IEEE Conference at Richmond, Virginia, U.S.A. Also another paper on Fuzzy Logic was accepted by IEEE Conference 2010 at USA. He serves as Session Chair, Presider and Reviewer. He serves as reviewer of American Marketing Association, Journal of Common Ground; Australia, IEEE Transactions, IJEAPS, AJHC, Journal of Supercomputing.

He has more than two hundred thirty five (235) publications and among these one is as Monograph in International Journal on Management Science, one Monograph is in Journal of the World Universities Forum, one is in Consumer Behavior, two are in Computer Science, one is in Neuroscience, one is in Linguistic and rests are Creative Writing of English Literature. In Creative Writing two papers have been incorporated in SSRN's Top Ten Download List three times in November, December 2010 and April 2011. In ResearchGate his papers have reached a milestone through more than 130000(one lakh thirty thousand) reads. Scholars' Press and Lambert Academic Publishing House, Germany have published twelve books between the months July to December, 2016. New Texas, A Journal of Literature and Culture, Sul Ross State University,

Alpine, Texas, USA has published ten essays in February 2018. International Educational Scientific Research Journal (E-ISSN : 2455-295X) and Research Chronicler & Research Innovator (ISSN: 2347-503X; 2348-7674) publish Creative Nonfictions every month regularly. Now he is pursuing his PhD thesis in Business Management in University of Calcutta, India. Also he is currently focussed on the Extension Works of Huffman Code i.e., Coding Theory and Pattern Recognition through Fuzzy Logic (Pattern Recognition, Image Processing, etc) of Computer Science.

His hobby is Creative Writing (Nonfiction). He says:

Creative writing is based more on manifestation rather than on expression. It does not inform rather it reveals, so it bears no reference. The best creative writing is critical, and the best critical writing is creative. As you know well that, Francis Bacon (1561-1626), the immortal writer, wrote many essays, and notably "Of Love", "Of Friendship", "Of Ambition", "Of Studies", etc. The myriad-minded genius rightly pointed out that all the words of the dictionary can be the themes of essays one can write. But little has been done, in this regard since his death, in order to finish his unfinished monumental works. In fact Bacon's way of presentation and his unique style kindled imagination and inspired me to write essays, in the light of creative writing, thus to get relief through Catharsis.
