

OF SPECIFIC

DIBAKAR PAL ¹

¹ PHD STUDENT IN INDIA.

ABSTRACT

Specific implies detailed and exact. It relates to one particular thing, etc. It is not general, rather it moves from the general to the specific. In any debate or argument in the court the matter must be specific. If the argument of the enemy or opponent is based on logic it is enjoyable more than the baseless fallacy of the friend or even of father.

KEYWORDS: SPECIFIC, DETAILED, EXACT, PARTICULAR.

INTRODUCTION

Creative writing is based more on manifestation rather than on expression. It does not inform rather reveals, so it bears no reference. The best creative writing is critical, and the best critical writing is creative. The present article is the outcome of creative writing meant for lay readers. As such free style is the methodology adopted so that pleasure of reading can be enjoyed by the common mass. As you know well that Francis Bacon (1561-1626), the immortal essayist, wrote many essays and notably, *Of Love, Of Friendship, Of Ambition, Of Studies*, etc. The myriad-minded genius rightly pointed out that all the words of the dictionary can be the themes of essays one can write. But little has been done, in this regard since his death, in order to finish his unfinished monumental works. In fact Bacon's way of presentation i.e., his unique style kindled the imagination already in me and encouraged me as well to write essays, in the light of creative writing, thus to get relief through Catharsis.

ARTICLE

Specific implies detailed and exact. It relates to one particular thing, etc. It is not general, rather it moves from the general to the specific. In any debate or argument in the court the matter must be specific. If the argument of the enemy or opponent is based on logic it is enjoyable more than the baseless fallacy of the friend or even of father.

Specific means having a special application, bearing, or reference. It implies specifying, explicit, or definite. It is specified, precise, or particular. It is peculiar or proper to something, as qualities, characteristics, or effects. It is of a special or particular kind. Biologically it is of or pertaining to a species. Medically it is of a disease produced by a special cause or infection. Also it implies remedy having special effect in the prevention or cure of a certain disease. Immunologically it is of an antigen or antibody having a particular effect on only one antigen or antibody or affecting it in only one way. Commercially it is noting customs or duties levied in fixed amounts per unit, as quantity, weight, or volume. As per physics it is

designating a physical constant that, for a particular substance, is expressed as the ratio of the quantity in the substance to the quantity in an equal volume of a standard substance, as water or air. Further it is designating a physical constant that expresses a property or effect as a quantity per unit length, area, volume, or mass. It is something specific, as a statement, quality, etc. Medically it is a specific remedy.

Specific means clearly defined. It implies definite. For example: A jungle may not have a specific tree alone rather it may be a combination of various trees. Those various trees may be specific taking altogether. Without specific terms a thing cannot be identified or traced or sorted. It relates to a particular subject. It is peculiar. For example: A style specific to that one. It is of or concerning a species. For example: The specific name for a plant is required to the gardener. It implies possessing or concerned with, the properties that characterize a species. For example: The specific forms of animals are unique. It, e.g., of a duty or a tax, assessed by quantity or amount, not by the value of goods. As per archaic, it is a medicine or remedy specifically effective for a disease or part of the body. It is a specific aspect or factor. For example: The discussion of the meeting should be specifics.

Specific is peculiar to or characteristic of something e.g., specific trait. It is of a particular sort. As per medicine it is specially indicated as a cure for a particular disease e.g., a specific remedy. It is produced by a particular microorganism e.g., a specific disease. It is something specially suited for a given use or purpose. It is a specific cure or remedy. It is a distinct item or detail. It implies particular.

Specific implies limiting or limited. It is explicit e.g., no specific plans. It is peculiar to or characteristic of something e.g., specific traits. It is of a special, or particular, sort or kind. Also it is rare. Specific is definite, distinctly formulated e.g., a specific statement; has no specific aim.

Specific is relating to particular subject. It is peculiar e.g., has a specific style; a style specific to that school of

painters. It is of a duty or tax assessed by quantity or amount, not by value of goods.

Specific is of special application or origin. It implies specifying. It is precise. It is of a parasite, restricted to one particular host. It is of a stain, colouring certain structures or tissues only. It is of a physical constant, being the ratio per unit volume, area, or especially mass, etc. It is a remedy or medicine for a particular disease or part of the body. It is anything that is specific.

Specific is of or forming a species e.g., the specific name of a plant etc. It is possessing, or concerned with, the properties that characterize a species e.g., the specific forms of animals; draws a specific distinction between them. Thus specific means constituting or determining a species. It is pertaining to a species. It is peculiar to a species.

Specific name is in biological nomenclature, the name of the species, i.e., the second name, the first being the generic name. Specific is a combining form limited or specific to. It is characteristic of a specified thing or person e.g., species-specific.

Specifics imply particular aspects or details of something. Specifically means in a specific manner. It means particularly. Specificity means the quality of being specific.

Specification is the action or an instance of specifying. It is state of being specified. It is a detailed description of the parts of a whole. It is something specified, as an item in a bill of particulars. It is the act of making specific. It is the state of having a specific character. It is a detailed description of the construction, workmanship, materials, etc., of work done or to be done, prepared by an architect, engineer, etc. It is a detailed description of the construction and performance of an appliance, machine, vehicle, etc. It is a description by an applicant for a patent of the construction and use of his invention. Legally it is the conversion of materials into a new product not held to be the property of the owner of the materials.

Specify is to state something clearly and definitely. It is to mention or describe in detail. It is to state definitely or explicitly. It is to include as an item in a set of specifications. It is to name expressly or mention definitely e.g., specified the type he needed; items, details, ingredients, etc., or absolutely. It is to name as a condition e.g., specified that he must be paid at once. It is to include in architect's specifications e.g., a French window was not specified.

Specify is to mention or name specifically. It is the state in detail. It is to give a specific character to. It is to name or state as a condition. It is to make a specific mention or statement. Specify is to mention, describe, or define in detail. It is to state definitely to specify the time and place. It is to include as an item in a set of specifications. It is to state explicitly as a condition. It is to mention particularly. It is to make specific. It is to set down as requisite.

Specific is omnipresent. Without specific nothing can be achieved or no destination can be reached. With specific

aim an intelligent person attains success in time. Some persons dilute it rendering it general thereby fail in every sphere of life.

Specific instructions are given to remove confusion thus to get desired result. Every student should have specific aims. Beliefs those are specific to this part of Africa. The money is to be used for one specific purpose i.e., the building of the new theatre. They all agreed on their basic aims, but when they got down to specifics it became more complicated. The patient was specifically warned not to eat fish. The houses are specifically designed for old people. The report's recommendations lack specificity. Specifications for building a garage are very important in modern housing complex. The technical specifications of a new car vary from company to company thereby sophistication differs. One should look at the job specification prior to apply. The offer did not meet our specifications. The specification of blue as the colour of paint is very common and popular as well being economy. The contract specifies red tiles, not slates, for the roof. The regulations specify that calculators may not be used in the examination. A specific sum of money is required as application fee. Specific characters are unique for each species and vary from one to the other. The letter contained no specific instruction regarding our job. A project must have some specific aims. Nemesis is the specific characteristics of Greek drama. The fund was set apart for a specific purpose. They had specially ordered that item. The new tax always is specially denounced. The type of material to be used has been specified in the contract.

Specific gravity, as per physics, it is the ratio of the density of any substance to the density of some other substance taken as standard, water being the standard for liquids and solids, and hydrogen or air being the standard for gases. Also it is called relative density.

Specific heat is the number of calories required to raise the temperature of one gram of a substance by one degree centigrade or the number of BTU's per pound per degree F. Originally it is the ratio of the thermal capacity of a substance to that of standard material.

Specific impulse is a measure of the efficiency of a rocket engine, the ratio of the thrust obtained to the fuel consumed, usually per second. It is a measure of the efficiency with which a rocket engine utilizes its propellants, equal to the number of pounds of thrust produced per pound of propellant burned per second.

Specific volume, as per physics, is the volume per unit mass. It is the reciprocal of density. Specific cause produces a particular form of a disease. Specific difference is a factor that differentiates a species. Specific disease is caused by one identifiable agent. Specific remedy or medicine is having a distinct effect in curing a certain disease.

Specific performance, as per law, is the exact performance of a contract or an order compelling it. It is the performance of a contractual duty, as ordered in cases

where damages would not be adequate remedy.

Specific means something specially suited for a given use or purpose. It is a specific cure or remedy. It is a distinct item or detail. It is particular.

Specific characters are the persistent features that distinguish one species from all others.

CONCLUSIONS

Argument should always be specific. To the point answer is called specific. It gets higher credit both in examination and in the court thereby every sphere of life. Quarrel has no base. It is not specific. It is merely a noise. So it is not valued at all. Two wise persons argue on specific point. Two fools cannot argue due to lack of knowledge. So they quarrel. They show muscle power that diverts them from the specific direction. In the court specific example is only valued. There may be many corruptions. But for punishment specific case is required. As such the judge or the authority or the administrator always asks for specific example to take specific action as per specific law.

ABOUT THE AUTHOR

Pal, Dibakar is a Retired Executive Magistrate in India and PhD Student. Though he is a Civil Servant yet he is genuinely interested in diversified academic fields. As such, he holds master degrees in M.Sc(Math), M.A(English), M.A(Bengali), M.B.A(HRD), M.C.A, P.G.D.M.M(Marketing), L.L.B, D.C.E(Creative Writing), M. Phil (Business Management),UGC- NET(Management)-2008. He attended an International Conference at IIT, Mumbai, India and five International Conferences at U.S.A; though he gets invitation to present papers in many International Conferences at home and abroad round the year. He presents papers on Computer Science, Management, English Literature, Linguistic, Philosophy, Philology, Psychology, Sociology, Humanities and Poems. He presented a paper on Computer Science and Chaired in 2007 IEEE Conference at Richmond, Virginia, U.S.A. Also another paper on Fuzzy Logic was accepted by IEEE Conference 2010 at USA. He serves as Session Chair, Presider and Reviewer. He serves as reviewer of American Marketing Association, Journal of Common Ground; Australia, IEEE Transactions, IJEAPS, AJHC, Journal of Supercomputing.

He has more than two hundred ten (210) publications and among these one is as Monograph in International Journal on Management Science, one Monograph is in Journal of the World Universities Forum, one is in Consumer Behavior, two are in Computer Science, one is in Neuroscience, one is in Linguistic and rests are Creative Writing of English Literature. In Creative Writing two papers have been incorporated in SSRN's Top Ten Download List three times in November, December 2010 and April 2011. In ResearchGate his papers have reached a milestone through more than 130000 reads. Scholars' Press and Lambert Academic Publishing House, Germany have published twelve books between the months July to December, 2016. New Texas, A Journal of Literature and

Culture, Sul Ross State University, Alpine, Texas, USA has published ten essays in February 2018. International Educational Scientific Research Journal (E-ISSN : 2455-295X) and Research Chronicler & Research Innovator (ISSN: 2347-503X; 2348-7674) publish Creative Nonfictions every month regularly. Now he is pursuing his PhD thesis in Business Management in University of Calcutta, India. Also he is currently focussed on the Extension Works of Huffman Code i.e., Coding Theory and Pattern Recognition through Fuzzy Logic (Pattern Recognition, Image Processing, etc) of Computer Science.

His hobby is Creative Writing (Nonfiction). He says:

Creative writing is based more on manifestation rather than on expression. It does not inform rather it reveals, so it bears no reference. The best creative writing is critical, and the best critical writing is creative. As you know well that, Francis Bacon (1561-1626), the immortal writer, wrote many essays, and notably "Of Love", "Of Friendship", "Of Ambition", "Of Studies", etc. The myriad-minded genius rightly pointed out that all the words of the dictionary can be the themes of essays one can write. But little has been done, in this regard since his death, in order to finish his unfinished monumental works. In fact Bacon's way of presentation and his unique style kindled imagination and inspired me to write essays, in the light of creative writing, thus to get relief through Catharsis.
